ANNOUNCEMENTS

Student Archaeology Club received a grant from the AIA for Society Outreach and will use the money for t-shirts and tote bags for those that join, renew, or donate the Tallahassee AIA Society.

LECTURES

“Four Millennia in An Egyptian Province: Discoveries of the Moalla Survey Project” with Dr. Colleen Manassa, Yale University – Wednesday, February 6th at 8 pm (Room 249 FAB)

“Terrace House 2 in Ephesus” with Sabine Ladstatter of the Austrian Archaeological Institute – Tuesday, March 26

DIGITAL TECHNOLOGY IN ARCHAEOLOGY

A new high energy scanner, called a micro-CT machine, is being utilized to analyze archaeological finds in 3D. This technology allows for materials to be examined while still in the soil. To learn more:

ANCIENT MEDICINAL TABLETS UNCOVERED

Aboard an ancient Roman shipwreck, six medicinal tablets were found. They are dated to 2,000 years old. The tablets held a variety of ingredients, such as animal and plant fats, pine resin, and zinc compounds, that researchers say would have been used to cure infections. To learn more:
